### **Short project description:**

Romanian Pilot Centre for Network, Competence and Training for people affected by rare diseases, based on model from Frambu, Norwegian national centre for rare disorders and disabilities. The Norwegian PWS Association will follow the project through reporting from visits and meetings.

### **Expected results:**

- Pilot Center for Rare Diseases established, 1500 m2 new – partly new built, and partly renovated and refurbished.
- Training network for rare diseases created.
- Specialized services for RD patients and families, using the Frambu model.
