Grant rate: 83%	Case no: 2009/100026
Planned project duration: May 2009-April 2011	Project web-site: http://www.arpm7c.ro , http://www.ks.no

Short project description: Improving regional-level waste management in Romania through a combination of institutional building, small-scale pilot project implementation and awareness raising actions.
Expected results: <i>Component 1 - Institutional/capacity building</i>
<ul style="list-style-type: none"> • A revised regional waste management plan (with a statistical study and opinion poll to serve as inputs for revision) • Two associations (one made up of public and private entities as well as NGOs, the other a network of regional environmental NGOs) – legally established (i.e. legal set-

up papers finalised)

- At least 220 staff trained in waste management related issues.

Component 2 - Practical small-scale pilot project implementation

- Three waste-management pilot projects implemented as follows:
 - a – one composting system for biodegradable waste in Saliste consisting of training to users and the procurement of equipment – special bins;
 - b – one mobile installation for the treatment of construction/demolition waste in Saliste consisting in the procurement of equipment/machine and in defining legal guidelines/implementation rules and
 - c – one collection system of hazardous waste from household waste in Medias consisting in the procurement of equipment and in information sessions

Component 3 - Awareness-raising

- 12 awareness-raising sessions on waste management in general and selective collection in particular
